## PROFESSIONAL SUMMARY

---

- 3 years of experience with Python, R, Power BI to conduct analytical and problem-solving solutions on large datasets across various projects.
- 2+ years presenting detailed oriented business applications, dashboard reporting, and communicating insights to non-technical audiences with Excel and Power Point.
- 3+ years of customer service experience in fast paced-environments like healthcare
- 5+ years of organizing and planning group events for Scouts Canada and collaborating with a team

## EDUCATION

---

### Simon Fraser University

Sep 2021 – Jun 2025

Bachelor of Science in Data Science

Burnaby, British Columbia

Courses: Operating Systems I, Data Structures I/II, Artificial Intelligence I, Business Communications, Business Marketing, Customer Analytics, Critical Thinking in Business, Database Systems I

## TECHNICAL SKILLS

---

**Tools:** Java, Python, C/C++, SQL (MySQL), Microsoft Excel, R, Windows, Linux, Pyspark

**Packages:** Pandas, NumPy, Matplotlib, Scikit-learn, GGplot2, Tidyverse, Rstatix

## PROJECTS

---

### Cataract Patient Mapping | *Python, Excel*

Mar 2026 – present

- Scraped patient information from Accuro EMR
- Cleaned and transformed data into readable data utilizing numpy and pandas
- Using folium and geopy package to make a heatmap for patient cold zones
- Suggested which optometrists to reach out based on cold spots revealing potential revenue opportunities

### Credit Default Predictive Analysis | *R*

Jan 2025 – Apr 2025

- Analyzed 10,000+ customer data to build predictive models for risk segmentation
- Built and trained a random forest regression model to predict credit default with an 85% accuracy
- Created dashboards to visualize insights and drive data-informed recommendations for financial decision-making.
- Presented actionable recommendations on customer profiling based on the history of card payments missed

### Parking Ticket Analysis | *Python, VS code*

Sep 2024 – Nov 2024

- Processed and analyzed over 100,000+ data points from municipal databases using pandas and Excel.
- Cleaned and transformed raw data variables into meaningful variables for analysis
- Built meaningful reports highlighting trends in violations, supporting operational decisions.
- Applied ANOVA tests and developed visual insights for targeted recommendations

## EXPERIENCE

---

### Ophthalmic Technician

Jun 2025 – Present

Eyewest Vision

Canada

- Collect, enter, and validate diagnostic data for 40+ patients daily with high accuracy
- Communicated with patients to help answer and questions or concerns about health
- Utilized Accuro EMR to go through medical history with patients
- Edited and merged letters on Word and sent to referring doctors

### Receptionist

Jun 2023 – Jun 2024

Metrotown Mazda

Canada

- Greeted and communicated with customers to direct customers to services that they required
- Verified and updated records to ensure data accuracy across departments
- Scheduled and coordinated data across service, sales, and insurance teams
